Mental Ability Scale VVS/6

This test VVS/6 consists of 48 exercises and you have a total of up to **40 minutes** for completing them. Please try to submit your answers as quickly as possible, replying to all of the questions as precisely as you can. Each correct answer will give you one point. The proportion of correct, incorrect and unanswered questions will be displayed in the test report, after you have completed the test. We recommend to solve the exercises sequentially, but you may complete them also in the order that suits you best.

If you have already <u>filled the same test</u> in the last two years, please let your test organiser know before you start. If a test is completed several times, your test organiser will receive a notice which also includes the date of the last testing.

When completing the test, you may use a white sheet of paper for notes. You may also <u>use a calculator</u>, but you **must not** use the help of other people, mobile telephones, search engines or any other means.

We recommend that you use a mouse or touch pad for filling the test, depending on which one you are accustomed to. The screen of your computer should not be very small.

To give you an idea of the exercises, please see the examples:
