

Personality Inventory NEO-TRI/2

The test NEO-TRI/2 consists of 199 statements that describe various behaviours, thoughts and feelings. Please read each statement carefully and consider whether it applies to you.

As your answer, please mark the most suitable option on the following scale:

- mark "**strongly agree**", if the statement is very often characteristic of you;
- mark "**mostly agree**", if the statement is generally characteristic of you;
- mark "**hard to say**", if the statement applies to you only from time to time or you really cannot tell;
- mark "**mostly disagree**", if the statement is generally not characteristic of you;
- mark "**strongly disagree**", if the statement is not at all characteristic of you.

EXAMPLE:

I am motivated by situations where I have to take risks

- strongly agree
- mostly agree
- hard to say
- mostly disagree
- strongly disagree

If you enjoy such situations, then the statement is definitely characteristic of you and you should mark "strongly agree". If you are put off by risks rather than motivated by them and you would better avoid risk-taking, you should mark "mostly disagree".

Only YOUR personal opinion concerning these statements is expected, therefore there are no right or wrong answers - the answers are just characteristic of you. Please give your opinion about every statement. You should use the option "hard to say" only if you cannot find a more appropriate answer. Please complete the test at one go because you will not be able to continue if you log out during the test.

The test has no time limit but please give your opinion rather quickly without too much contemplation.

Good luck!

I HAVE READ THE INSTRUCTIONS CAREFULLY. I AM READY TO PROCEED WITH THE TEST!
